

2026-2027 - Graduation Project - Format Graduation Proposal

1. General Information

Full student name:

Email address:

Proposed project title:

2. Company Overview & Project Supervisor (and technical support)

Company:

Company website:

Company structure and the technical expertise in the team:

Company profile: *[Provide a brief introduction about the company in your own words. (think about: what is the product of the company, what do they focus on, who are the stakeholders of the company, ...)]*

Company policy on use of AI:

Company supervisor name:

Email:

Who within the company can provide you with technical supervision and has the time?

Name:

3. Project Overview

Current situation: *[Describe the context and the current situation that requires a solution.]*

Problem statement: *[Provide a brief description of the problem statement (What is the main problem that the company have decided to define this project?)]*

Sub-problems: *[Break down the problem statement into sub-problems and describe their complexity/challenges.]*

Project Description: *[Provide a brief description of the project, try to provide an answer on how you will solve the problem statements and the sub-problems.]*

4. Methodology and Technology Stack

Outline the methods, tools, and technologies you plan to use for the project.

Research methodologies: *[e.g., interviews]*

Development Methodology: *[e.g., Scrum]*

Development / Deployment Environment:

Programming Languages:

Frameworks/Libraries:

Tools and Technologies:

Other Resources Needed:

Project technical Constraints: *[For example, the desired solution need to be implemented in a certain language or tool.]*

Please remember, this is a concept, and this can change over the time of the project.

5. Milestones and Planning

[Provide an estimated timeline and key milestones for the project.]

Start Date:

Completion Date:

Estimated timeline: *[Please match this with the planning in the course manual, chapter 4]*

Solution: *[Describe your solution and the output you are trying to achieve within this project]*

Milestones: *[Can you name milestones in your project? Milestone 1, Milestone 2, etc.]*

6. Competencies

6.1 Description *reviewed by company supervisor*:

The student should provide additional information from the course manual on what the school expects of each of the competences to the company supervisor.

Describe briefly how this project is going to allow you to satisfy the competencies, and what are the expectations:

- Professional Skills & Manage and Control Analysis:
- Analysis:
- Advice:
- Design:
- Realisation:

Note: Please attach any additional documents or diagrams that support your proposal, such as initial sketches, charts, or other relevant materials.

6.2 Competencies Matrix

[Fill in the matrix to see what exhibits cover what competencies, for an example see Appendix A]

Name company supervisor:
Date:
The company supervisor confirms that they are aware of and agree to the possible involvement of an external IT professional at the end of the project for assessment purposes.
Signature for review:

Appendix A - Example matrix coverage competencies
