

Project Title

[First Name and Last Name]
CMI-INFormatica

[student_number]@hr.nl

Abstract—Write a short abstract here: in one paragraph what was the main problem and what has been done.

Keywords—Main keywords can be listed here.

I. INTRODUCTION (HEADING I)

This template is a modified version of a template provided by IEEE for papers. We will try to use this modified version to write about graduate projects.

Keep the headings for each section and replace the body of each section with your text.

Keep in mind that the goal is not to write a full report about your project. What you write here must be precise and self-explanatory to provide evidence about your project. **It is expected that the document be between minimum 5 pages and maximum 10 pages.**

The introduction can start with the context of the project.

A. Problem Statement

A short text about the problem statement: problem that was the initial idea for this project.

B. Research Questions

Write down your finalized research questions here.

II. BACKGROUND

Write a short background here, if it is necessary. Otherwise remove this section.

III. RESULTS

Explain the work you have done and the results you have achieved as your final product. In your explanation clarify how research questions are addressed and satisfied in your work.

A. Formulas

Here is an example of a numbered formula, if needed:

$$a + b = 0 \quad (1)$$

B. Citing references

An example of using a reference [1].

C. Figures and Tables

a) *Positioning Figures and Tables*: Place figures and tables at the top and bottom of columns. Avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be below the figures; table heads should appear above the tables. Insert

figures and tables after they are cited in the text. Use the abbreviation “Fig. 1”, even at the beginning of a sentence.

TABLE I. TABLE TYPE STYLES

Table Head	Table Column Head		
	Table column subhead	Subhead	Subhead
copy	More table copy		

Fig. 1. Example of a figure caption. (*figure caption*)

IV. COMPETENCIES

In this section you will clarify how your project and your activities address each competency. **This section is very crucial.**

A. Professional Skills, Manage and Control

Explain here ...

B. Analysis

Explain here ...

C. Design

Explain here ...

D. Realizarion

Explain here ...

E. Advice

Explain here ...

V. CONCLUSION AND REFLECTION

Write your conclusion here.

VI. DELIVERABLES

Explain the contents of your Graduate Folder here. What is the content of each folder. Do not forget to use proper naming for your Graduate Folder and its content. The content can have one of the following formats: images, recorded videos, plain text, pdf, project source codes. Consult with your supervisor what needs to be delivered. An example is provided in Appendix B of the course manual.

REFERENCES

The template will number citations consecutively within brackets. An example is given in [1].
